

COVID-19 Post-Antigen Test Instructions

Antigen Testing process

Preregister for your test

Using your phone, scan the site provided QR Code and pre-register for your test. If you do not have a phone or are unable to pre-register, there will be a team member on-site to assist with this process. Once registered you will receive an email.

The Testing Process

A medical professional will need to verify a few pieces of information from your registration (name, date of birth, phone number, and email address). Once verified, your specimen will be collected. After collection, your specimen will take 30-60 minutes to result.

Results

You will receive an email and a text message when your result has been validated. Please address any questions with onsite staff. If you have any additional questions, please call our Telehealth team (866) 809-8282.

We are required to determine if you have any form of insurance, including private insurance, Medicare or Medicaid, to pay for these services. You have either provided us with your insurance information or you attest that you do not have any form of insurance. If you have no insurance, we will bill the federal HRSA uninsured fund.

Results

If you are asymptomatic and have not had close contact or known exposure to Covid-19 and you have resulted as negative; **No additional follow up is needed.** This is considered a negative.

If you are symptomatic, have had close contact or known exposure to Covid-19 and resulted as negative; This is considered a presumptive negative and the result should be confirmed with a PCR test. **Quarantine until symptoms have resolved for more than 24 hours and you have received a negative PCR test.**

If you are asymptomatic and have not had close contact or known exposure to Covid-19 and resulted as positive; You should confirm the result with a PCR test. **You should begin prompt isolation for 5 days from the date of the first positive test, followed by 5 days of wearing a mask when around others; unless a negative PCR test is obtained.**

If you are symptomatic, have had close contact or known exposure to Covid-19 and resulted as positive; this is considered a positive. Please return for a PCR test. **Begin prompt isolation for 5 days. You may discontinue quarantine after 5 days, yet you should continue to wear a mask when around others for 5 additional days or if a negative PCR test is obtained.**

Result are based on CDC and MDHHS guidelines and recommendations.

PCR

If you are in need of a confirmatory PCR test, please return to the facility where you took your antigen test. They will be able to provide a PCR test.
